Moshe Simantov

I convert ideas to reality.

Summary

I have started programming computer games since age 11. At age
13 I start learning C by myself and at age 15 I start working as a
freelancer. I'm an entrepreneur in my blood and always looking for
new ways to scale and improve things. My biggest inspiration in life
is the evolution process in nature and I try to implement it on my day
to day actions.

_____
